

Navigation Sector Strategy

Read the strategy here →

Vision

Greening the European inland waterway network by mainstreaming Nature-based Solutions

Action A

Develop an action plan for greening inland waterways

Actors: DG Move, DG Env

Action B

Build confidence by installing Communities of Practice

Actors: DG Move, DG Env, international river basin commissions, national and regional waterway authorities

Action C

Share experiences with NbS in inland waterways

Actors: Stakeholders in NbS implementation projects

Action D

Minimise engineering of inland waterways

Actors: Waterway authorities and nature organisations

Action E

Prioritise inland waterways based on their ecological status and role for navigation

Actors: DG Move and DG Env with contributions from national authorities responsible for implementing TEN-T, WFD and NRL

NbS in this context

Measures that serve the navigability of inland waterways while improving their ecological status, particularly river hydromorphology. This includes measures that mitigate the effects of climate change on inland waterways.

NbS – Nature-based Solutions
